## Summary

My *expertise* is in (knowledge-based) Modeling&Simulation and Artificial-Intelligence, with a focus on Scientific applications, coupled with an ability to push the norm by creating innovative applications in any domain. I often help with multi-disciplined problems, by leveraging my varied background. I am a uniting force as both a knowledge-worker & knowledge-engineer. I look forward to stimulating peer interaction on challenging projects (e.g. building an assisted problem-solving/knowledge-managment environment for your domain).

Research-Programmer / Knowledge-Engineer with a ~50/50 research/consumer split in experience.

Seeking position as a creative computational problem-solver including:
